

Wireless Network Guide for iOS iPhone, iPod Touch and iPad

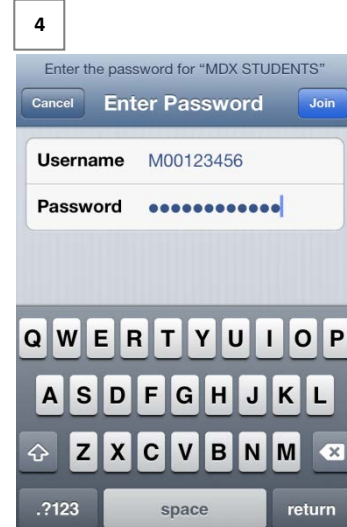

1 On your iOS device (iPhone, iPod Touch or iPad), start by tapping the **Settings** icon:

On the Settings page, select **Wi-Fi**, and make sure it is switched on.

You will then be asked to choose a network. Tap on **MDX STUDENTS**, and you will be prompted for a password.

Please ensure you enter your MISIS Number (e.g. M00123456) and password details correctly. Use the password that logs you into University Computers. Tap on **Join**.

On the next screen you will be asked to accept the **Client Authentication** certificate.

Check here to confirm that the certificate originated from a valid and secure university server - **isemdx.studentmdx.ac**
After verifying, tap on **Accept** to confirm network connection.

The airport icon in the menu bar will then indicate a successful connection to the **MDX STUDENTS** network. You will now have access to the internet, as well as all university resources.
